

A graphic consisting of several blue and teal cables that enter from the left, loop around, and connect to a grey cloud icon on the right. The cables are rendered with a slight 3D effect and shadows.

HEALTHCHECK TECH KNOWLEDGY

HEALTHCARE REIMAGINED

Informational Presentation

THE CONVERGENCE OF URGENT CARE, CONCIERGE MEDICINE, HEALTHCARE TECHNOLOGY, AND REAL ESTATE.

Data Enhancement

It's all about the data. We use data capture and analytics to improve population health; offer better treatment plans; expand functional medicine; educate the world; and sell medical devices, equipment, vitamins and supplements.

In doing so, we provide additional streams of income to HealthCheck and other medical providers.

Data Aggregation

Our cloud data warehouse allows us to capture and manage data.

Data Capture

Data capture via our online digital portal, PMS, and social media

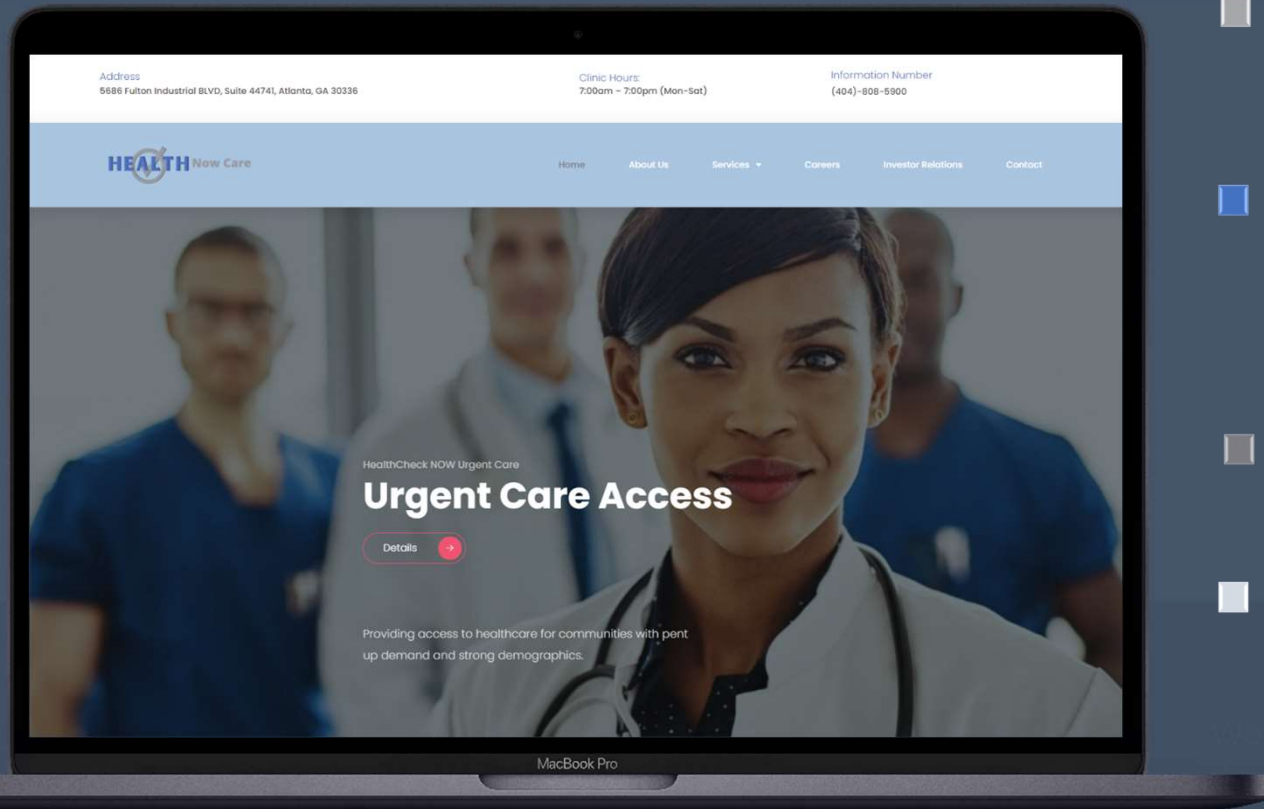

Data Analytics

We share our healthcare protocols with the world.

HealthCheck Tech Knowledge Benefits

The information below is for illustrative purposes only. It reflects how the portal interface can be organized.

- All video capabilities, including telehealth and virtual visits, can be executed through our healthcare portal and patient dashboard.
- Our solution allows us to centrally process electronic documents, including intake forms, store and forward documentation and images, and any other document control needs.
- Our solution allows us to market and sell healthcare and other products that fit our brand.
- The solution gives us video storage capability, enhancing our ability to provide a knowledge base of up-to-date healthcare information and driving more traffic to our brand.

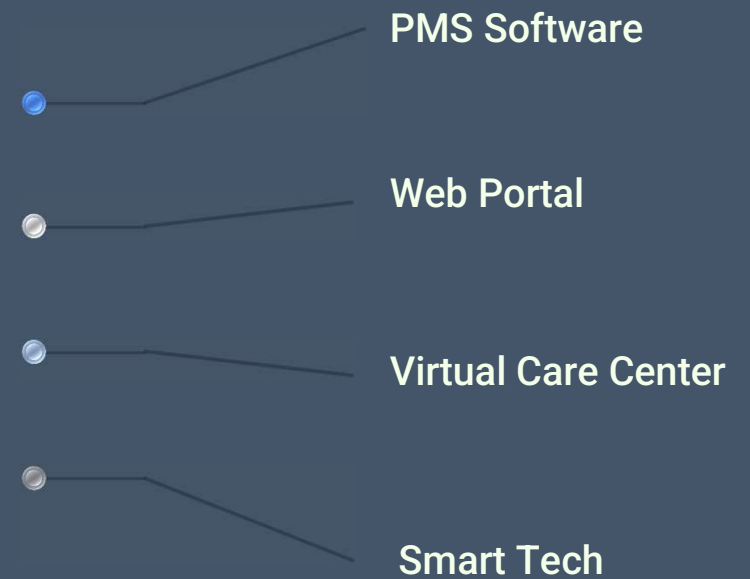

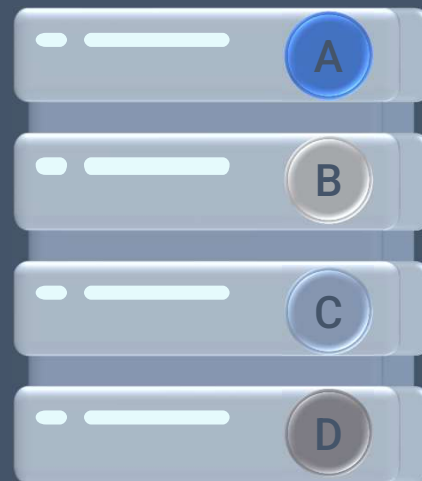

HealthCheck Database Design

HealthCheck is developing a holistic approach to providing physicians and other healthcare providers with a platform that communicates effectively with the community member or patient. We are building a data warehouse that allows us to collect and aggregate data from several entry points. We will use the data entry points below:

Developing a wholistic approach to treatment

HealthCheck will collect data from the multiple vertical data entry points and integrate the data into intelligent data and warehoused into secured data silos to protect content/patient information.

We will develop user-friendly software to ensure HealthCheck is more efficient, effective, and productive in serving our customers in our brick-and-mortar and virtual care centers.

HealthCheck Member Dashboard

As part of our hybrid concierge medicine program, we provide our community members with a dashboard that aggregates the data needed to manage their healthspan appropriately. In addition, we document every step of the patient journey and provide accurate, secure information.

Identify, Measure, Monitor, and Control Health Risks

We manage and improve healthspan using various technologies and more consistent blood testing.

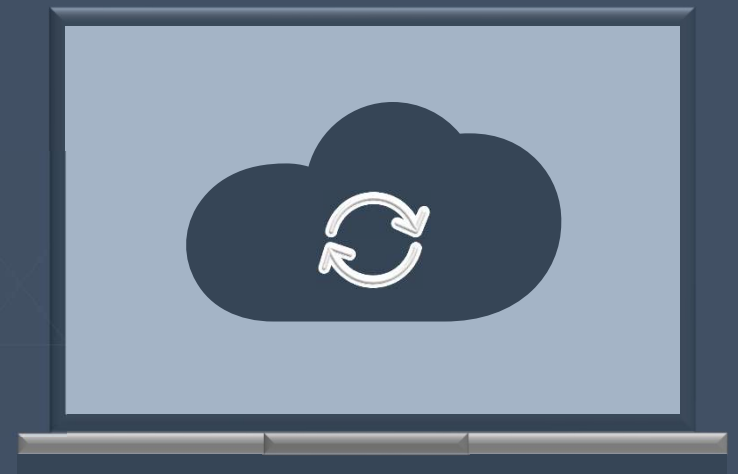

As technologies improve, our ability to accomplish our healthspan goals improves.

PMS and EHR

Data from Wearables

Blood Test Screening

DNA Testing

Data Analysis Diagram

Marketing is the study and management of exchange relationships. Marketing is the business process of creating better, long-lasting relationships with our community members. At every point in our member engagement, we find ways to serve the members better.

InTake

We capture data before the member enters our facility and begins the patient journey and marketing protocol.

EHR

As data and diagnosis are entered into the EHR, we suggest medical supplies, research information, and other services we offer.

Check Out

We engage our members after their visit to survey their opinion about our services and to market our concierge medicine program.

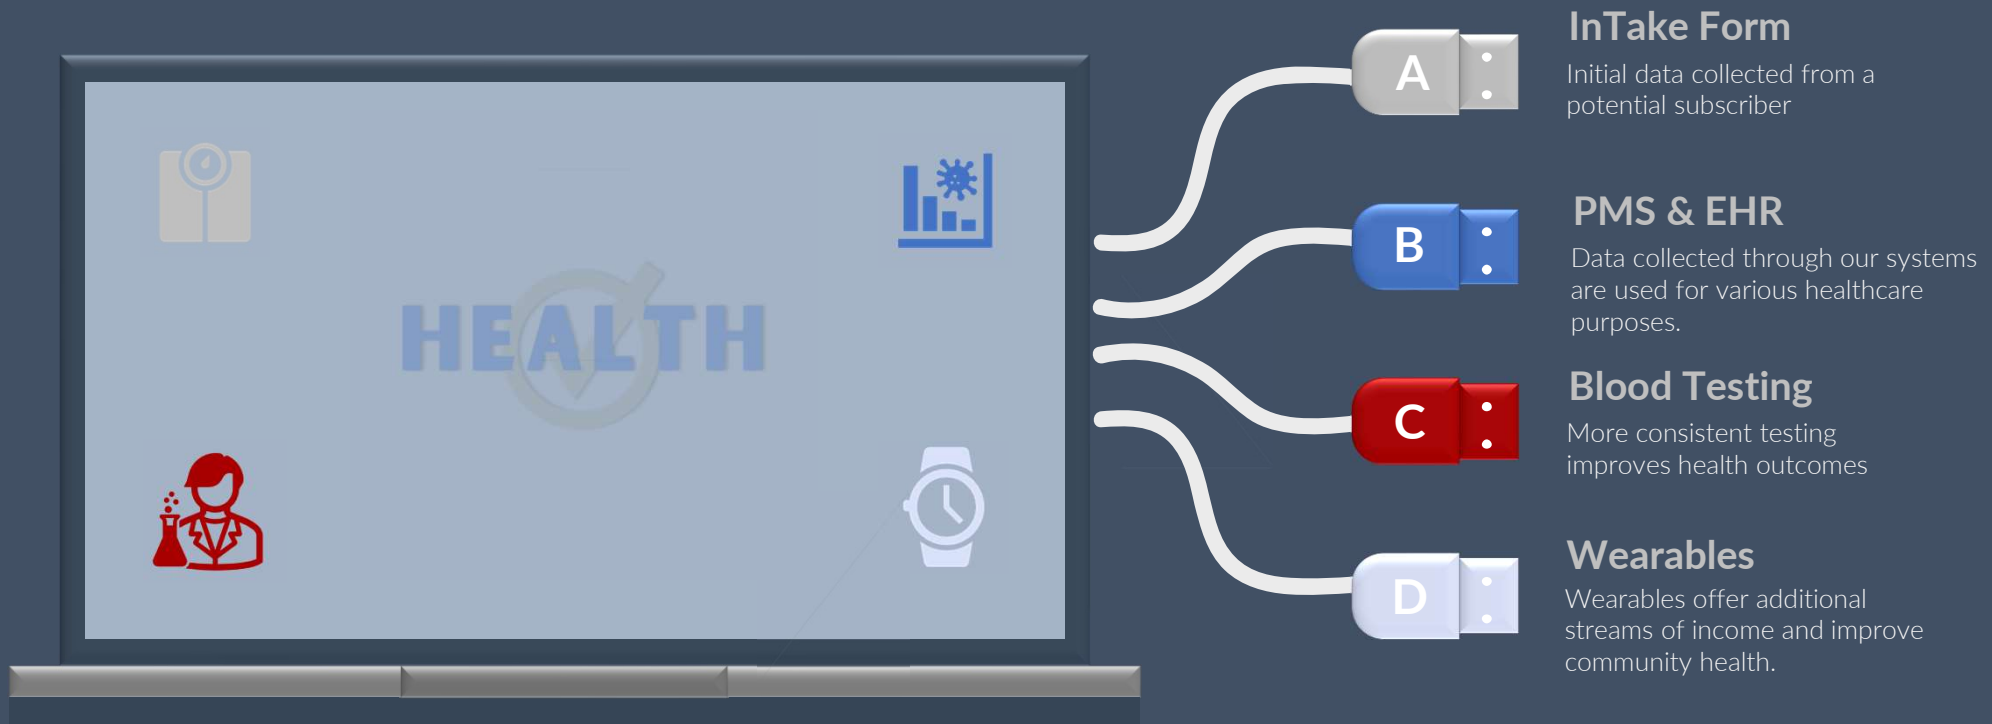

Measure

Once a concierge member, we add data from wearables and other health data to provide a comprehensive anti-aging and lifespan program for the recipient.

HealthCheck Member Dashboard

As part of our hybrid concierge medicine program, we provide our community members with a dashboard that aggregates the data needed to manage their healthspan appropriately. In addition, we document every step of the patient journey and provide accurate, secure information.

HealthCheck App

Using Apple Health Kit and Google Fit XXX, we create apps that give users vital health, fitness, nutrition, and healthspan information to share with our community members.

Our app and dashboard aggregate data to market to our subscribers and urgent care members

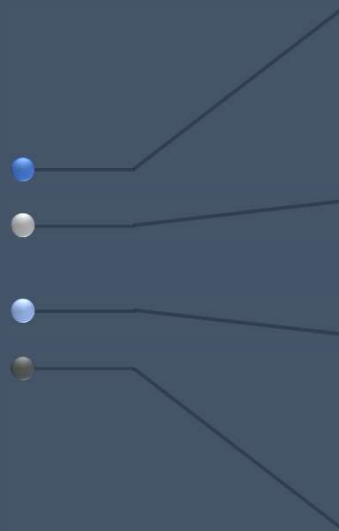

Our App includes a medical database to research diagnosed afflictions

Supplements and vitamins can be ordered through our medical eCommerce Mall

Data Collection and Aggregation

We are developing user friendly software that will assist HealthCheck and other healthcare providers to be more efficient, effective and productive in serving our community members in both brick and mortar and virtual care centers.

Practice Management Software

Data that is allowed by law to be shared will be captured into our data warehouse.

Online Portal

Our portal can be used to search medical and other terms and is used to target advertising.

Telemedicine Portal/ Virtual Care Center

Data that is allowed by law to be shared will be captured into our data warehouse.

Smartwatch and Device Technology

Data from smart technology can be used to enhance functional medicine and market products to consumers.

What is HealthCheck's Online Portal?

Telehealth is the use of digital technology that allows consumers to remotely connect to health information, products, and services. It provides healthcare access to millions of people at a significantly lower cost. Our portal provides additional streams of income to healthcare providers

Our platform allows for direct one-on-one communication between healthcare providers and patients.

Our video streaming capabilities are top notch.

Telemedicine

Our proprietary cloud portal allows providers to upload data for filtering and analytics, and video streaming content to their personalized web portal.

Use our content or the physician's content – or both.

Information Technology

Through smartwatches and cellphone technology, we monitor heart rates, blood glucose, blood pressure, etc.

As the technology grows, we'll grow with it.

Remote Monitoring

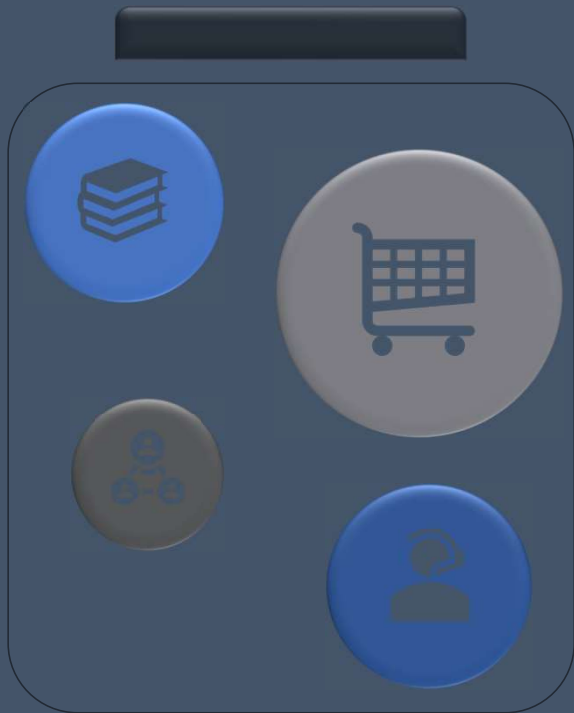

We provide an online marketplace that allows sales of wrist-based technology and other medical devices.

This is a significant revenue driver for HealthCheck.

Medical Device Sales

HealthCheck NOW Online Portal

In addition to the below, our portal offers two-way communication and teleconferences just like Zoom and WebEx, but our service offers ease of use and enhanced security

Medical KnowledgeBase

Provides HealthCheck and subscriber-generated video content for medical and healthcare-related topics. Our portal is similar to the functionality of [YouTube](#).

Medical eCommerce

HealthCheck offers to medical subscribers the option of selling medical devices to their patients and other populations through our online medical mall. Our mall is like what you would see at [Amazon](#).

Medical Networking

Our portal offers medical peer-to-peer interaction and knowledge sharing with other subscribers worldwide. The functionality of our networking tool is akin to [Facebook](#) and [LinkedIn](#).

Remote Patient Monitoring and Analytics

Our portal captures data that allow us to perform analytics for monitoring patients' vital statistics, performing population health analytics, and better managing workflows, all to improve the health outcomes of our community members.

HealthCheck Tech Healthcare Portal Preview

Medical eCommerce

Sell medical devices used in our remote monitoring feature.

Market supplements to patients to ensure their healthy lifestyle.

Sell medical equipment through our exclusive product placements.

Sell smartwatch technology through various brands.

TeleHealth Platform

Access our proprietary two-way video streaming communication.

Expand patient access to healthcare nationwide.

Collaborate with other physicians and healthcare executives.

Interface with nationwide health record databases.

Remote Monitoring

Remote patient monitoring (RPM) uses digital technologies to collect medical data

HealthCheck Tech collects a wide range of health data from the point of care

Collects weight, blood pressure, blood sugar, blood oxygen levels, heart rate, and electrocardiograms

Data analytics monitors and alerts patients of negative trends.

Medical Knowledgebase

Online video platform for healthcare and medical professionals.

Video-sharing and storage of physician content on health-related topics.

Upload and share training videos for healthcare education.

HealthCheck Tech Medical eCommerce

Secure Protocols

We use the most secure cloud storage possible and are HIPPA-compliant

Payment System

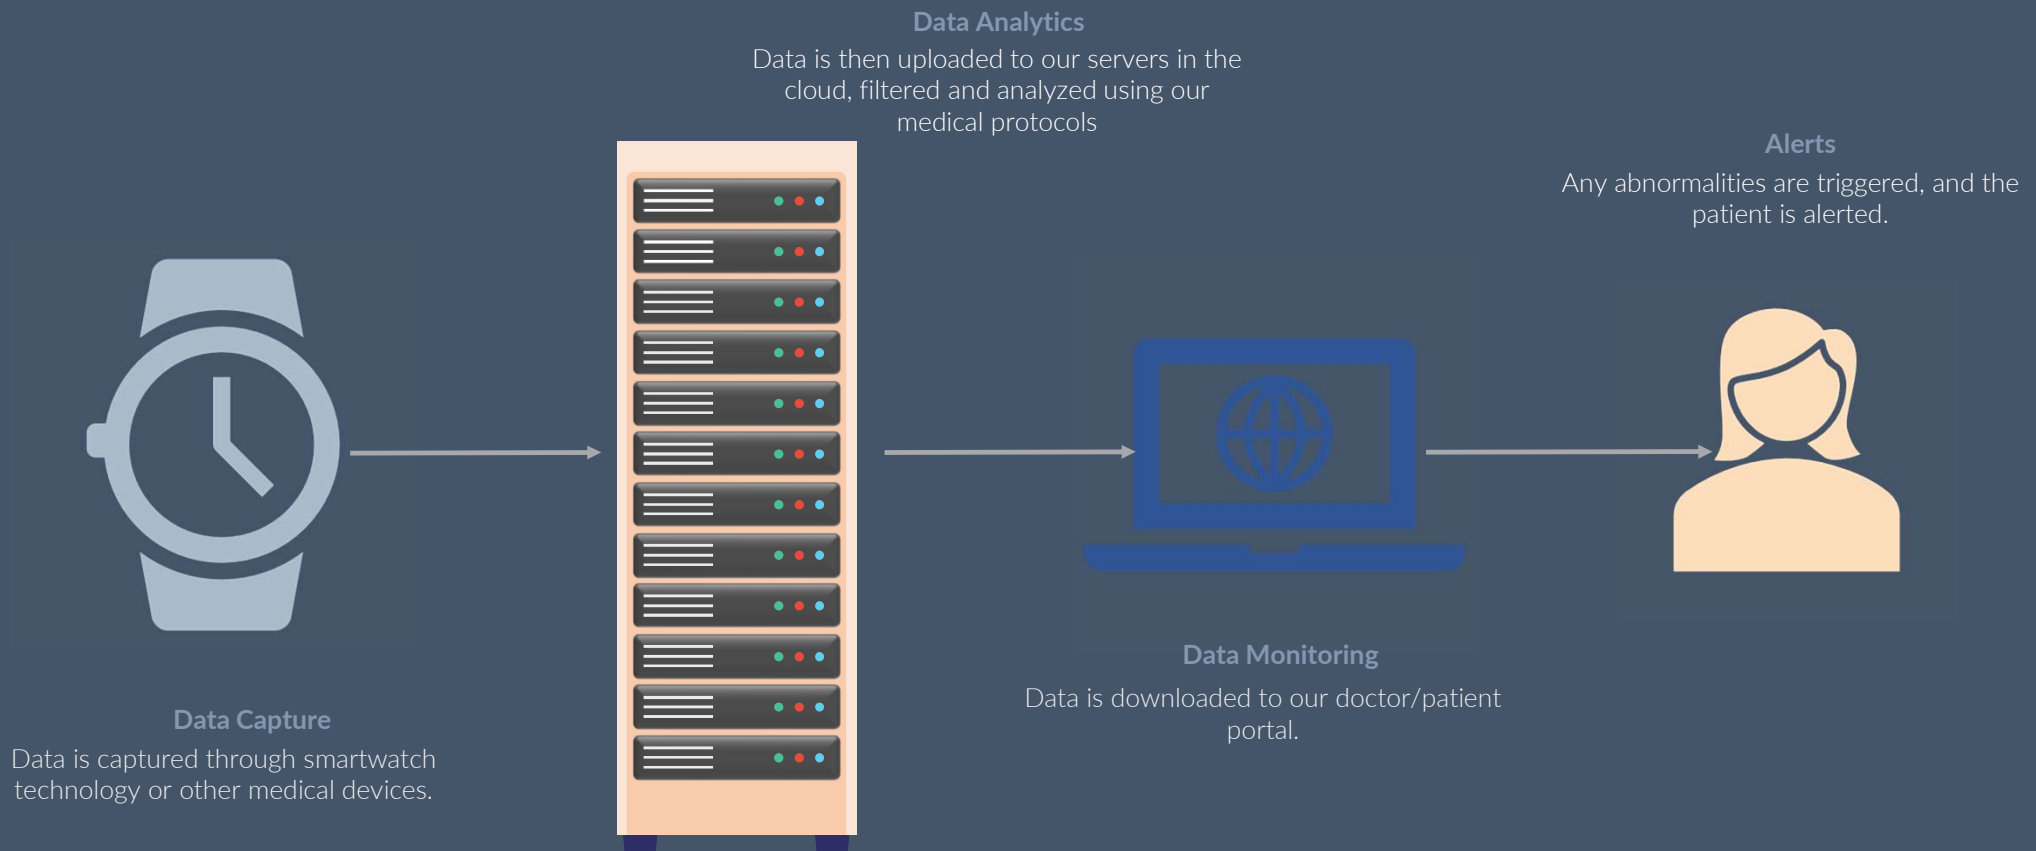

We use our payment system and others with which you are familiar.

Rewards Program

Physicians and patients get rewards for every dollar sold on the medical eCommerce Mall.

HealthCheck Remote Monitoring

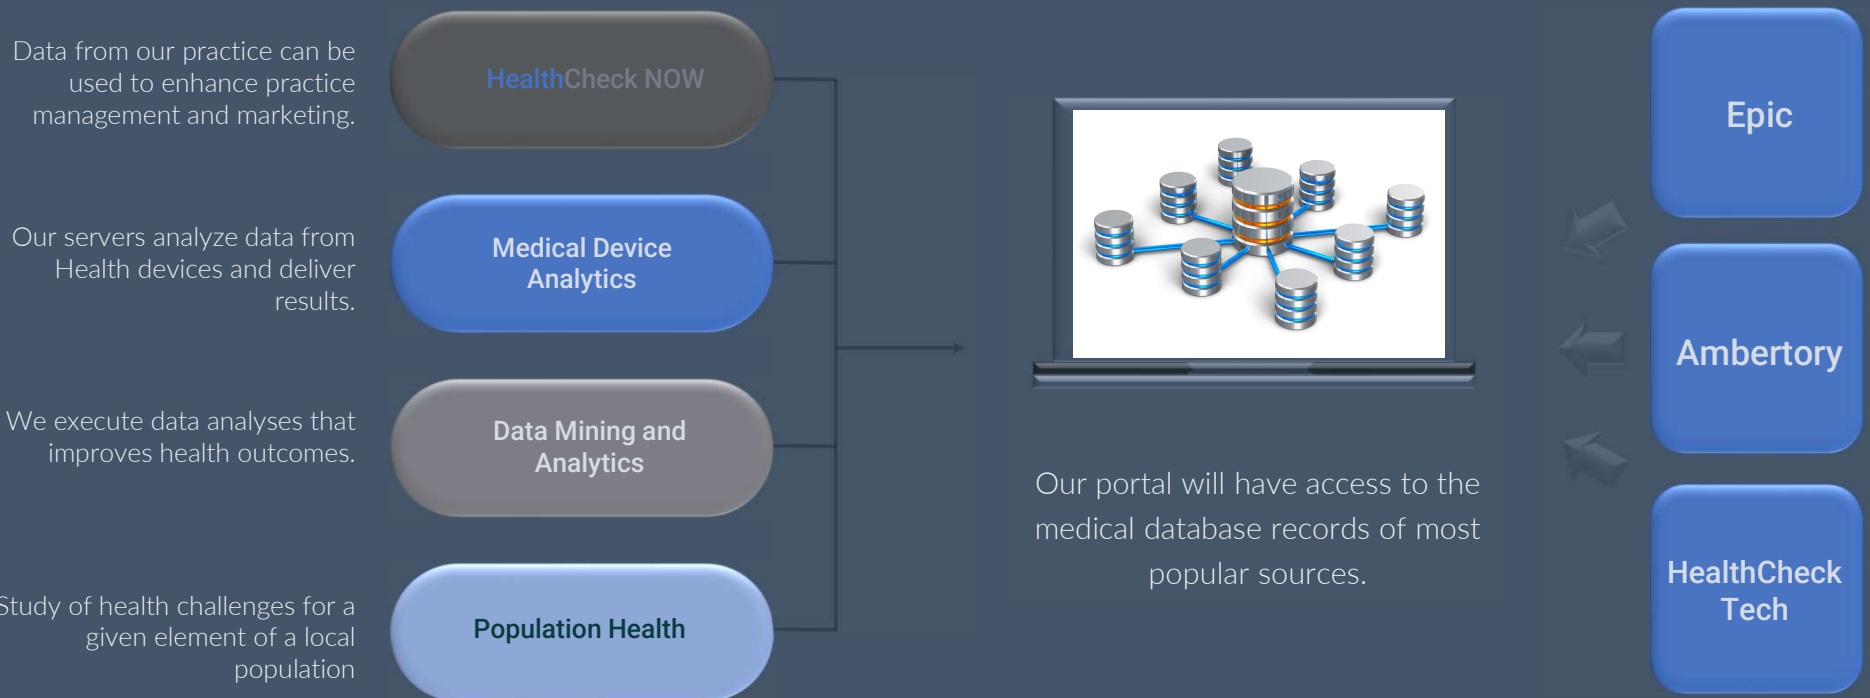

Pricing Tables

Our pricing hybrid concierge medicine program is structured to provide services that fit the needs of our community members. As with most services, the benefit to the member is based on the level of service requested.

	PatientCare	PatientCare +	PatientCare ++	PatientCare +++
Services	\$0/mo	\$19/mo	\$39/mo	\$79/mo
Basic Dashboard	✓	✓	✓	✓
Dashboard w/wearable review	✗	✓	✓	✓
Concierge with Medical Provider	✗	✗	✓	✓
Concierge with Medical Doctor	✗	✗	✗	✓
Monthly Healthcare Consultation	✗	✗	✗	✓

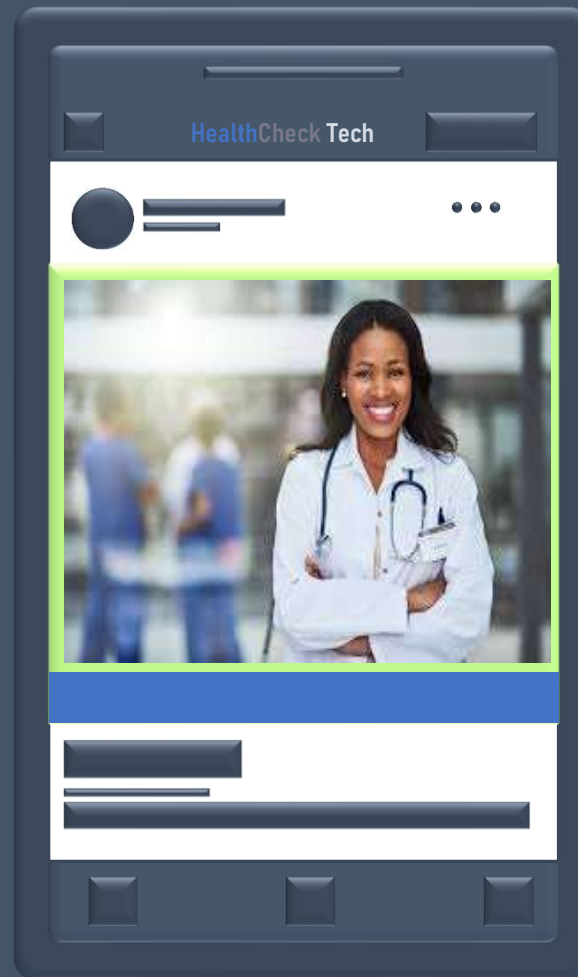

Computer / Database Design

As the medical and healthcare industries determine what can be done with health-related data, we are building the back-end to take leverage changes in data protocols.

Medical Knowledgebase

HealthCheck Tech's Medical KnowledgeBase offers a robust, scalable infrastructure for the placement, promotion, and monetization of a physician's digital assets in one multi-channel platform. HealthCheck Tech provides an innovative set of tools for medical and healthcare providers to upload content, discover new audiences and distribute relevant and meaningful content to the world effortlessly.

B2B

Share video content with other healthcare providers nationwide or globally.

B2C

Share content with current and prospective patients regarding medical matters.

Education

Record training and share with students and practice teammates.

Revenue

Our global social-commerce platform pays its members for all platform activity.

HealthCheck Platform Features

Our virtual technology, e.g., virtual urgent care center, eMedical Marketplace, and Medical/Healthcare KnowledgeBase collaborates with the brick and mortar urgent care center to be the new acute outpatient facility?

Feature Set 1

- ➔ Multi-Channel platform
- ➔ Global 4K streaming capabilities
- ➔ Pay wall integration

Feature Set 2

- ➔ Social Media integration
- ➔ On-Demand Platform
- ➔ Ad & Analytic Integration Server

Feature Set 3

- ➔ Video content monetization - AVOD – SVOD
- ➔ Video Cloud
- ➔ Video Analytics

Feature Set 4

- ➔ Social Media Analytics
- ➔ Zencoder cloud video transcoding solution
- ➔ SSAI content and ad technology

Additional Back-End Features

The HealthCheck platforms are built with the typical back-end features one would expect in a multichannel digital environment. All the usual suspects, with some additional functionality, can be seen below.

Feature 1

- Network Configured
 - Server Configured
 - Cyber Secured
-

Feature 2

- Business Intelligence & Analytics
- Blockchain Infrastructure
- Artificial Intelligence

Feature 3

- Database Warehouse
 - Digital Asset Management
 - CRM
-

Feature 4

- Fraud Protection
- Regulatory Compliance Standards
- Europay, Mastercard, and Visa (EMV).
